

HAPPENINGS FROM AROUND THE VT WING

23 NOV 2008

On November 11th, Air and Ground Search and Rescue assets from VTWG were activated by the U.S. Air Force Rescue Coordination Center for an Emergency Locator Transmitter that was activated in the central Vermont area.

They very quickly located the beacon, which turned out to be non-distress, at the Middlebury State Airport.

The owner was eventually located and the transmitter was silenced.
